18-24 mths

12-18 mths

6-12 mths

0-6 mths

0-3 mths

Find the right size for your child's feet.

1. Place child's heel on the U-shaped mark below (stand child to measure).
2. Draw a line in front of the child's longest toe.
3. Select a size that allows 1/4 inch (6 mm) of extra space for child's foot (chart measures INNER length of shoe). The shaded area the line falls in will determine the correct shoe size.

NOTE: If child's feet are between sizes, select larger size.

Place heel here
